## How do I archive or delete content that I share on my Facebook News Feed or timeline?

Computer Help

Copy Link

Right now this feature isn't available to everyone.

You can archive or delete some of the content you share on Facebook, like posts, photos and videos, directly from your News Feed or your timeline. From each post, you can choose to:

- **Move to Archive.** When you move content to your **Archive**, it'll only be visible to you. If you choose to restore your content, it'll be visible to the audience that was selected before it was moved to **Archive**.
- **Move to Trash.** When you move content to your **Trash**, it'll stay there until it is automatically deleted 30 days later. While it's in your **Trash**, it'll only be visible to you.
  - During the 30 days, you can restore your content to where you originally posted it on Facebook, move it to your **Archive** or you can select content to delete before the 30 days are over. When you restore your content, it'll be visible to the audience that was selected before it was moved to **Trash**.
  - After 30 days, the content will be automatically deleted and can't be restored.

You can also manage some of your content from the **Manage Activity** section of your activity log. Learn more about managing **Archive** and **Trash** in your activity log.

## To move your content to Trash:

1. Go to the post that you'd like to trash.
2. Click  in the top right of the post.
3. Click **Move to Trash**.

Keep in mind, when you move something to **Trash** it'll be automatically deleted after 30 days, unless you choose to delete it sooner or restore it. Once the content is deleted after 30 days, it can't be restored.

## To restore content you've moved to Trash

You can restore content in your **Trash** in your activity log.

1. Click your profile picture in the top right of Facebook.
2. Click  below your name, then click  **Activity Log**.
3. In the top left of your activity log, click **Trash**.
4. From here, you can:
  - Restore your content to where it was when you posted it: Hover over the content you'd like to restore, then click . Click **Restore to profile**, then click **Restore** to confirm.
  - Move content to your **Archive**: Hover over the content, then click . Click **Move to archive**. Your content will move to your archive.

After you've moved your content to **Trash**, it'll be deleted after 30 days. During the 30 days, you can restore your content to where you originally posted it on Facebook. When you
